A Transaction Cost View on E-Commerce

Transaction Costs:

- Costs caused by the exchange of resources
- **Search and information costs** are costs such as those incurred in determining that the required good is available on the market, who has the lowest price, etc.
- **Bargaining costs** are the costs required to come to an acceptable agreement with the other party to the transaction, drawing up an appropriate contract, etc..
- **Policing and enforcement costs** are the costs of making sure the other party sticks to the terms of the contract, and taking appropriate action (often through the legal system) if this turns out not to be the case.

O: Wikipedia, http://en.wikipedia.org/wiki/Transaction_cost

Coase: The Theory of the Firm

- Enterprises exist because for a part of the production process, internal coordination is less costly than the use of the market.
- The size of an enterprise is determined by the equilibrium between the internal coordination costs vs. the costs of using the market mechanism.

Malone: Electronic Markets and Electronic Hierarchies

By reducing the costs of coordination, information technology will lead to an overall shift toward proportionately more use of markets—rather than hierarchies—to coordinate economic activity.

THOMAS W. MALONE, JOANNE YATES, and ROBERT I. BENJAMIN

- Electronic market mechanisms allow the use of markets for smaller transaction volumes, for more urgent needs,
- A general shift towards markets was predicted.
- Criticism: Only one side of the coin, since IT also reduces the cost of internal coordination.

How does IT affect transaction costs?

- Mechanized operations are
 - less costly per transaction
 - faster
- ➔ **feasible for a bigger part of potential market transactions**
- Examples
 - Google reduces search costs
 - SWS discovery reduces search costs
 - ontologies ease product description
 - online quotations for insurances
 - more information about partners
- ➔ **reduced search and information costs, bargaining costs, policing and enforcement costs**

Introduction to Electronic Commerce

- Business-to-consumer (B2C) e-commerce
 - An average US family saves already 4500 \$ per year
- Business-to-business (B2B) e-commerce
- Consumer-to-consumer (C2C) e-commerce

© Copyright 2005 Digital Enterprise Research Institute, The DERI Studio. All rights reserved. www.deri.at/teaching/ 11

Why is E-Commerce so popular?

- Reach
- Common Infrastructure
 - As soon as one is connected to the Internet, one can use **all** online services
- Speed and Asynchronous communication
- High degree of automation
- Ease-of-use, richness (e.g. images)

© Copyright 2005 Digital Enterprise Research Institute, The DERI Studio. All rights reserved. www.deri.at/teaching/ 12

Further Advantages

- High degree of automation
- Ease-of-use
- Richness (e.g. images, sounds,...)
- Interactivity
- Personalization

Global E-Commerce

- Steps in localization
 - recognizing and conforming to the nuances, subtleties, and tastes of local cultures
 - supporting basic trade laws such as each country's currency, payment preferences, taxes, and tariffs
 - ensuring that technological capabilities match local connection speeds
